Professional Summary:

- Current Employer : **Groots Software, Pune.**
- Period : Working since September 2021 to the present.
- Job Profile : Sr. Web Developer

Work Experience:

- **Project Name (1):** CloudNetra
- **Role:** Full-Stack Developer
- **Technologies:** Node.js, React, Angular, MySQL, SDKs, Elasticsearch, Prometheus. Grafana, AWS Services.
- **Project Description:** CloudNetra is a comprehensive cloud management platform designed to optimize resource utilization, enhance security, and achieve cost efficiency. The application provides deep insights into cloud services, automates reporting, monitors resource metrics, and offers robust alerting mechanisms. It empowers managers to identify optimization opportunities across cloud infrastructure.
- **Roles & Responsibilities:**
 - Designed and developed the full-stack application, ensuring seamless integration of front-end and back-end components.
 - Implemented efficient database schemas to store tag-based and service-specific data.
 - Created dynamic front-end dashboards to display tag-wise service instances and their counts.
 - Configured and monitored alert mechanisms to track threshold values, ensuring real-time notifications.
 - Developed and automated a comprehensive reporting module for operational insights and cloud visibility.
 - Integrated Prometheus and Grafana for advanced monitoring and metric visualization.
 - Collaborated with cross-functional teams, including back-end developers, front-end engineers, QA testers, and the CTO, ensuring project milestones were met.
 - Addressed and resolved integration challenges, ensuring seamless functionality across all modules.
 - Conducted performance optimization and ensured minimal downtime during database upgrades and content updates.
 - Actively contributed to brainstorming sessions, offering innovative solutions for resource optimization and cost management.
- **Project Name (2):** IOLCP, Balaxi and Regulatory Balaxi.
- **Role:** Full-Stack Developer
- **Technologies:** HTML, CSS, JavaScript, MySQL, PHP, Node.js, React.
- **Project Description:** A pharma-related platform encompassing a website and an admin panel designed with role-based access to manage regulatory, operational, and compliance data. The project provided an intuitive interface for managing pharmaceutical operations efficiently.
- **Roles & Responsibilities:**
 - Designed and developed the front-end interface using HTML, CSS, and JavaScript for user-friendly interactions.
 - Built the back-end system with MySQL, ensuring secure and efficient data storage and retrieval.

- Developed an admin panel with role-based access to manage different levels of user permissions.
- Ensured seamless integration between the website and the admin panel for consistent data flow.
- Implemented dynamic forms and data grids to manage pharmaceutical data efficiently.
- Conducted rigorous testing and debugging to deliver a reliable and high-performing platform.
- Collaborated with stakeholders to gather requirements and ensure alignment with business needs.

- Previous Employer : **Tecure Technology Private Limited, Pune.**
- Period : Nov 2020 to Aug 2021
- Job Profile : Web Developer

Work Experience:

- **Project Name:** Webstika, Lemonbasket, Skilldoc.
- **Role:** Web Developer
- **Technologies:** HTML 5, Java, CSS3, JavaScript, PHP.
- **Project Description:** This company is an E-Commerce based start-up company that aims to turn into the market leader and also committed to offering Corporate Services & IT-Professional Services. I was part of the Professional Services Team and mainly worked for client's customization.
- **Roles & Responsibilities:** Involved in designing part of the entire ideal space's web application. Worked on customization as per client requirement. Perform maintenance and updates to existing web applications. Make the UI responsible on different web browsers and on different resolutions. Involved in the meeting with team members and project manager to reach out the quality standards on regular intervals and project deadlines.
